

DIRECTALPINE
TECHNICAL OUTDOOR WEAR

summer 2019

COLLECTION SUMMER 2019 – INTRODUCTION

„Change is life“

Winter is now behind us. Besides fantastic wintertime experiences, the season also brought with it change to our company DIRECT ALPINE, nestled in its mountain valley just outside Liberec. The winter saw the long-prepared for change in the role of executive director, after Radek decided to step back from managing the company and spend more time doing his own thing.

When Radek asked me if I'd be interested taking on his role at DIRECT ALPINE, I accepted the offer almost instinctively. When I think about it now, with a little more hindsight, the whole thing confirms my belief that if – at the back of his or her mind – someone really dreams about achieving something, then fate will guide them, sooner or later, to that objective.

I've known Radek for ages. We go back to the time before DIRECT ALPINE started up over 20 years ago, and in those intervening decades we've been on a few mountain trips together. Of these I would single out the one that lodges deepest in the memory – West Buttress on Denali. Here we tested the prototype jacket Guide, in anorak form.

I always liked and admired his enthusiasm for even the slightest detail in clothing. His childlike joy for every new product convinced me with ever greater certainty that his products were the ones to use. And from a distance I've enjoyed following his success.

Here, I'd like to share one story with you. About 10 years ago, during my time in the States, one winter weekend I decided to set off on a two-day trek along the banks of Lake Superior on the Canadian border. You don't tend to meet many people out there in winter, so with a day's hike behind me I was surprised to meet two people. My surprise was even greater when we stopped to chat: the pair of them were entirely decked out in DIRECT ALPINE gear. As we got talking, it turned out that both were Czechs who'd been living in the States for a few decades. Despite the fact that the US outdoor market is strongly influenced by local brands, this couple had opted for a Czech producer. And what's more, from a friend's company based in my own hometown. As you can tell, I was rather proud of the fact.

They told me that they were highly satisfied with the clothing, and that it was a pity that the company was not represented in the USA. Which is when I realized just how astonishing had been Radek's and his team's progress: from a local little workshop to a company manufacturing products that could be seen far beyond the borders of the Czech Republic.

*Radek Novacek, founder & designer,
Mt. McKinley*

Petr „Špek“ Slanina,
D.A. Test Team

Jiří Doubrava,
Direct Alpine - CEO

Which brings us back to the present, and indeed the future. I accepted the job at DIRECT ALPINE for two reasons.

First – to work in a field that is my own hobby, with people who I know from the rocks and the hills.

Second – to contribute to the development of the DIRECT ALPINE brand, so that I can meet people wearing our super gear more and more often and in ever more remote locations.

I want our brand to maximize its potential. So that you, our customers can grow and enjoy success with it. I truly believe that with us you're about to take a significant step forward. We're going to spend a lot more energy on harmonizing the collection's colour scheme. And we'll be focusing much more on sales support. We're going to maximize our sales and marketing activities in both existing as well as new markets and territories. In short, we're taking a path that symbolizes everything the company stands for: uncompromising and straight to the summit – not just in terms of product quality, but also in co-ordinating the collection and in sales.

I wish you many successes with our new collection, and from now on you can look forward to great strides forward with each coming season.

Most of all, I wish you personally a great time this summer – outdoors in the wild. I hope you have a lot of adventures fulfilling your dreams out on the crags, mountains and wherever the summer finds you. You never know, maybe we'll bump into one another on the way.

Yours, Jiří Doubrava

Subject: Anfrage nach Katalog

Hallo,

durch Zufall bin ich 2011 über die Hose Cascade auf die Marke Directalpine gestoßen nach wie vor höchst begeisterter Zwischenzeitlich trage ich noch eine Cascade Plus, die Jacke Cerro Torre und Guide, sowie die Weste Attac. Man kann sagen, ich bin ein richtiger Fan Ihrer Marke geworden. Würde in erster Linie die Materialwahl und deren Robustheit und der schlanke Schnitt. Gerade in rauhen Einsatz in den Bergen Heine Frage an Sie ist jetzt, ob es möglich ist, dass Sie mir einen aktuellen Produktkatalog zusenden. Auf Ihrer homepage ist nur der Katalog aus 2014 zu finden. Gerne hätte ich jedoch einen aktuellen Katalog (2015 oder gar 2016 falls möglich)

Ich bin als Fach Übungsleiter für Bergsteigen und Hochtouren in der DAV-
Sektion Dörfleschlag oft in den Bergen unterwegs und mit vielen Leuten in Kont.
Würde mich freuen, wenn es eine Möglichkeit gäbe.

Danke im Voraus und viele Grüße
Gerhard Eissele

Ještě jednou děkuji za Vaši vycerpávající odpověď.
Opravdu, vaše výrobky pro mne jsou jedinečné a úžasné. Pro mne jste jedničkou na světovém trhu – kvalita-cena-výkon!!!
Ta radost, že jste česká firma s českými lidmi. Češi jsou opravdoví umělci – vždyť tady máme kromě vás ještě další
odporové firmy evropské úrovně.

At se daří vám všem na těle i na duši!
Přeji pohodový víkend.

Radomir Malik
Magistrát města Ostravy

Viele Grüße

Philipp

Předmět: Test Patrol

Hallo Onda,
die Patrol wurde bei einer Hochtour getestet, und kam sehr gut an: „das ist eine sehr gute Hochtourenhose mit einem klasse Preis-/Leistungsverhältnis“
Da fehlt nur noch ein Belüftungsschlitz an den Beinen, dann wäre das eine ideale Hose, unschlagbar!
Das ist das Testergebnis. Ich hoffe, daß der Händler mit einem kleinen Auftrag für Sommer 2014 beginnt.

MOUNTAIN TOP SERIE

The Mountain Top Serie of technical models is intended for demanding activities in mountain conditions, for expeditions and for other extreme activities. During the development of this clothing we stress maximum utility value, comfort of movement and protection of the user. We use the latest technology and cutting-edge components, and we carefully select intelligent, multifunctional materials which guarantee excellent properties and parameters even at relatively low weights. We focus maximum attention on the overall processing of the models and their cut.

The characteristic traits of this range are the technical design, functional accessories, details for the given use and practical colours. For our customers the products of the Mountain Top Serie represent their assurance in the mountains, on expeditions, on cliffs or for regular outdoor use. They know that they can always rely on them!

The Mountain Top Serie represents the traditional values of the brand DIRECTALPINE – uncompromising quality, functionality and reliability.

guide

This top quality protective jacket for the most demanding exertions has been given an adjusted cut and a more resistant material used for the collar and cuffs to give it a longer user life. Guide is the ideal jacket for mountaineering, hiking and alpine skiing. It has minimal weight and, at the same time, the durability of classic hardshell. The combination of resistant materials, minimal weight, precise anatomically-fitting cut, a range of technical details and the use of modern technology makes this the ideal functional back-up jacket that will never let you down. Assuredness, comfort and protection against inclement weather for all your adventures in the wild.

Uses materials with wonderful breathability.

Side vents which are easily reachable even when wearing a backpack, zips extending into the front part giving access to base layer pockets.

Back part elasticated at the waist to make it more figure hugging at the back.

Anatomically shaped sleeves with adjustable, reinforced cuffs.
Shaped bottom edge for comfortable leg movement, extended rear part.

• Tested by mountain rescuers..

Stiff hood with multidirectional adjustment which can be pulled over a helmet.

Central two-way zip with protective inner hem.

Raised front collar to protect the face, ventilation openings, an asymmetrical central zip which doesn't touch the face, the unzipped insert can be secured (by magnets) to the inside of the hood.
Reinforced front collar, shoulders, rear part, cuffs.

Large bellows front pocket, one inner zip pocket, an additional pocket on the sleeve with a space for a Recco signal reflector.

guide lady

GUIDE LADY is the top quality technical jacket every woman should have; a clear choice for trips to the mountains, alpine skiing or demanding treks. The main features of this model are minimal weight, great packability and, at the same time, as long-lasting and robust as a classic three-layer hardshell. The wonderful parameters of the membrane and backed seams keeps it waterproof. The jacket has a precise, anatomically fitting cut, a range of technical details and makes use of modern technology. All this makes it a top quality mountain jacket even for extreme conditions. A model for the active woman who lives for the outdoors and wants to feel good in every kind of weather.

Packed jacket.

Central two-way zip with an inner protective hem.

YKK zips.

Extended rear part.

Firm hood with multidirectional adjustment, can be pulled over a helmet.

Shaped collar front, an asymmetrical central zip which doesn't touch the face, the unzipped insert can be secured (by magnets) to the inside of the hood.

Two large front pockets, one inner zip pocket, an additional pocket on the sleeve to hold a Recco signal reflector (a device to aid mountain rescue searchers in case of avalanche).

Side vents easily accessible even when wearing a backpack. Zips extending into the front panel giving access to pockets in the base layer.

Uses materials with wonderful breathability.

Anatomically shaped sleeves with adjustable cuffs.

midi

Very lightweight upper reserve pants with excellent compressibility. A high quality functional 3-layer laminate with the weight of a two and a half layer one, with significantly higher lifespan and resilience. Comfortable and stretchy material. Technical treatment and details allowing year-round seasonal use. Ideal reserve pants for mountain hiking, mountain climbing, ski touring and all outdoor activities.

One zip pocket which also serves as a practical transport pocket when the pants are rolled up.

Water-repellent side zips asymmetrically moved to the rear parts (elimination of damage) allowing ventilation and, most importantly, allowing the pants to be put on over boots (including ski boots).

Lower edge of legs with circumference regulation, sufficiently wide to fit even over ski boots, with additional securing hook for clipping the lower part onto laces.

Inner side of knees reinforced with wear-resistant fabric.

Comfortable elastic waistband with possibility to use belt, clip-on braces.

Fly with water-repellent zip with two way sliders.

Packed pants.
(in zip pocket)

Tested by mountain guide (UIAGM) Zdeňek Hák on the SATISFACTION - GASHERBRUM I expedition.

Háček says:

"On Gash I took with me things from Direct that I know and use, and I knew they wouldn't disappoint in any situation... I tell you, on the Gash these pants really surprised me! I originally wanted to do the whole route in classic DEVIL ALPINES but then I decided to try and cut down on weight and save a few grams. So I plumped for MIDI. I really put them through the mill but they stood the test!! To tell you the truth, I was very surprised at how much they stood up to and how well they are cut (which, for that matter, all your pants are). Yeah, they picked up a small hole from crampons. I was pretty tough on them, but then again, as always, it only costs a few crowns to repair them, doesn't it? MIDI were the biggest positive surprise of the trip when it comes to equipment. A big thank-you for these great pants!"

dru

A very light universal jacket intended for all mountain, climbing and any other outdoor activities. The anatomically well-designed cut and stretchiness ensures the user maximum comfort. The used material (Cordura) ensures sufficient protection against the wind and also ensures mechanical resilience and long lifespan of this jacket. Low weight, good packability, excellent permeability. The ideal choice for climbers, alpinists or outdoor enthusiasts and for everyday use.

Possibility of easy stowage in hood and attachment to harness or backpack.

Shaped collar with simple, functional and practical connecting hood. The hood does not restrict your view or movement at all, can even be used very well under a helmet.

The asymmetrical zip does not go up to the face.

Two roomy side zip pockets located higher for accessibility with backpack waist strap, one practical chest pocket.

Cordura WBL system (Wicking, Barrier, Lightweight), Mixed fabric - Coolmax® (for moisture removal) + Cordura (for abrasion-resistance and durability), partial resistance against water and wind.

Anatomically shaped sleeves terminated with elastic trim with possibility of pulling over wrist, thumb hole.

Extended rear part.

One-handed drawing of shaped lower edge.

cruise tech

The precise, comfortable cut fits perfectly and copies the curves of the body. These pants give increased freedom of movement due to the fitted gusset. They are made from a superb material (elastic Cordura) with high flexibility, outstanding wear resistance and low weight supplemented with a strong, elastic material with an inner Coolmax layer on the knees and seat. An elastic insert in the lower part of the leg allows these pants to be pulled over climbing or ski-alpine boots. This increases the functionality of the pants and makes them suitable for all-year-round use.

Elasticated waist, adjustable belt with buckle.

Two front pockets and one larger zip-pocket on the thigh.

Reflective elements and stitching for nighttime visibility.

Shaped knee parts.

Cordura WBL system (Wicking, Barrier, Lightweight), Mixed fabric - Coolmax® (for moisture removal) + Cordura (for abrasion-resistance and durability), partial resistance against water and wind.

cascade plus

cascade lady

Very comfortable, well-designed year-round trousers for the widest range of outdoor activities. Completely universal trousers, can be used very well for trekking, mountain climbing, climbing, hiking, cycling or everyday wear. They have long been a popular model, in particular because of the great and effective combination of functional materials and very well designed comfortable cut. Thanks to the combed bottom (inside) side of the basic parts ideal for whole year. Anatomically exact cut for unlimited mobility. Used fabrics with high elasticity and resistance. Hybrid combination of materials with fast-dry (vapour transportation) and thermo-insulating adjustment (maintaining body temperature).

OUTDOOR SERIE

For many seasons now we have been developing products of the Outdoor Active serie for the broader outdoor public.

These are reliable models for everyday outdoor events. But as a result of the quality of the materials and careful workmanship, they can also be used under the most demanding conditions.

The casual and very comfortable cuts and naturally also the use of high-quality functional materials guarantees the customer excellent comfort both for the regular outdoors and during everyday wear. We pay great attention to the design of the cut and all the details.

The common trait of the models from this series is great value for invested money.

The models of the Outdoor Active Serie are distinguished by their imaginative, creative design with technical elements and well-designed details. The colours and details are based on current trends.

For this series our customers always appreciate the typical merits of DIRECT ALPINE brand products, mainly pure utility, quality and perfect workmanship.

talung

A practical reserve jacket for most normal outdoor activities based upon our most successful hardshell jacket, Guide. It's made from a light triple-layer material giving excellent protection against water penetration while allowing humidity out. The adjustable hood is precisely cut with a peak. The shoulder and side panels are reinforced for increased protection against mechanical damage. The two main side zip pockets are easily accessible even with the tummy strap of your backpack fastened or when wearing a harness. In addition there is a spacious breast pocket. The anatomically shaped sleeves have easy-to-use zip vents in the back section. Thanks to the elasticated waist the jacket adapts wonderfully to your base-layer of clothing. The bottom edge of the jacket is anatomically shaped for maximum comfort and is fitted with a drawstring which can be tightened with one hand.

Easily accessible side pockets, one spacious breast pocket.

Adjustable strap in the rear panel (for a closer fit to the back).

Anatomically shaped sleeves; adjustable cuff opening.

Stiffened hood with adjustment.

Ventilation openings in the back of the sleeves, easily reachable even when wearing a backpack.

Extended back section.

talung lady

A new addition to our collection! A ladies' version of our highly acclaimed Talung hardshell hiking jacket. This practical waterproof jacket has a simple construction but, thanks to its carefully worked cut, it fits perfectly. It offers the wearer wonderful comfort as well as great protection from inclement weather. The precisely cut peaked hood and two-directional adjustment won't limit your view. Two roomy main zip pockets along with one breast pocket and one inside pocket are sufficient to carry everything you need. The jacket has an extended cut to give extra protection. The decorative stitching around the pockets, in the bottom hem and cuff endings underlines the feminine appearance of this model. This is an ideal jacket, not just for hiking and medium strenuous activities in the mountains but also for everyday casual wear.

..... Anatomically shaped, well-fitting adjustable hood.

..... High, protective, below-the-chin collar.

..... Two main zip pockets, one zipped breast pocket and zipped inside pocket.

..... Attractive decorative stitching and details.

..... Simple drawstring on the bottom edge of the jacket.

spike

New! The light, highly-packable Spike vest is the essential companion for any sportsperson, hiker or traveler. The time proven elastic material, Swing Cool protects the central part of the body against wind and, at the same time, thanks to its high breathability, also keeps you dry. The precise fitting cut of the jacket and elasticated underarm parts adapt to your base layer clothing, so do not limit movement. The Spike vest can be used for all aerobic activities throughout the year – cycling, in-line skating, running, hiking, climbing or even alpine or cross-country skiing.

Elasticated armholes.

badile

Popular pants for all-year-round use. Ideal pants for mountain hiking, mountain climbing, hiking, ski alpinism and all outdoor activities. Fitting anatomical cut. Highly elastic and resistant fabrics. Hybrid combination of materials with fast-dry (vapour transportation) and thermo-insulating adjustment (increasing body temperature). Design allows omitting and repositioning of some seams to eliminate their possible damage. These have long been DIRECTALPINE's bestselling technically designed pants. Very popular and a proven favorite, our customers fittingly refer to them as a "second skin".

These new, universal outdoor and travel pants offer the wearer lots of pockets. These are secured with zips for safety when carrying stuff. Thanks to a functional combination of two light, stretch, highly breathable materials, these pants fit perfectly and are extremely suitable for use in warmer weather. The material is very comfortable and quick drying. Thanks to the zip in the lower part of the leg they can be shortened to three-quarter length. So you get two pants for the price of one! They can be used for a wide variety of activities – hiking, travelling, nordic walking, and because of their attractive design they can also be worn for everyday casual wear.

style: men (REGULAR FIT)

bishop

These new pants with a modern, progressive design are an extension to our 'climbers' range of pants. The use of a tried and tested, light, elasticated material together with a precise anatomical cut and significantly shaped knee parts provide the wearer with maximum comfort during any kind of outdoor activity. They are also suitable for climbing, bouldering, hiking and other sports in the countryside, and last but not least, for everyday leisurewear.

Adjustable waist with a belt with a metal buckle and loops for Direct Alpine belts.

Two pleated pockets, one pleated back pocket.

Loop for brush and chalk bag.

Anatomically shaped knee sections.

The leg endings can be secured with an elastic cord.

Embroidered Direct Alpine logo on the back of the leg.

boulder

New pants primarily designed for climbers and lovers of movement on vertical faces. Their construction combines our time-proven fabric for increased durability while, at the same time, ensuring comfort even during the most demanding climbing or extreme bouldering. A light, breathable stretch material forms the basis for these pants, reinforced with a stronger, more fray-resistant cloth on the thighs and knees. The wide elasticated waistband with minimal seams is comfortable even when wearing a climbing harness. Boulder are the ideal pants for movement on rocks, sporting and hall climbing, via ferrati and bouldering.

Elasticated waist with wide elastic and minimum seams for comfortable use with a harness.

Loop for chalk bag.

Pleated side pockets with an inner loop for attaching keys.

A hybrid combination of a strong durable material with a light, breathable one.

Simple adjustment of leg length thanks to the laced ends.

4wayTex®

4wayTex®

4WAYTEX is a trademark of DIRECTALPINE company materials of sandwich construction, which individual layers, properly combined, ensure excellent product parameters. SOFTSHELL 4WAYTEX is focused for excellent permeability of laminate along with maintaining low weight and sufficient wind and waterproofness.

Coolmax®

Coolmax® is a high tech fabric specifically and uniquely engineered to keep users dry and comfortable. Coolmax® fabrics are made from specially engineered polyester fibres from ADVANSA with an increased surface area. This special four-channel or six-channel fibre forms a transport system that pulls moisture away from the skin to the outer layer of the fabric.

Coolmax® All Season Technology

Coolmax® All Season Technology provides warmth and comfort without weight, even when wet. It's the lightweight fabric that provides heavy-duty performance engineered hollow-core fibres that trap air for greater insulation. Coolmax® All Season T. is the perfect layering fabric because it's comfortable and lightweight, allowing more freedom of movement.

Cordura®

CORDURA® fabric is durable, versatile and reliable. Constructed using high tenacity fiber technologies.

Dermizax™

Dermizax™ is a waterproof, windproof, and wicking membrane that is specially developed to provide protection against all kinds of weather while remaining as comfortable as possible. Dermizax™ membrane is a hydrophilic material that utilizes moving molecules, as opposed to most other membranes which have micropores. This offers a number of advantages and makes Dermizax™ shell clothing the very best on the market thanks to its high performance and superior durability.

Dynamic soft shell

2-3 layer laminate with excellent permeability. Material developed with particular focus on vapour-permeability along with low weight and sufficient wind and waterproofness. Weight-light, flowing laminate with inner fleece insulating layer.

DuPont Sorona – Espol

Sorona® renewably sourced fiber delivers superior performance benefits to sustainable clothing. Fabrics that use Sorona® are very soft, very strong and dry quickly. Sorona® helps fabrics stretch comfortably and retain their shape. Sorona® contains 37% annually renewable plant-based ingredients by weight.

Freshcool

Freshcool combines 2 technologies into 1 textile. Outside protects the textile from water, dirt and stain. Inside moisture from the skin is absorbed and quickly transmit to the outside.

Gelanots

Soft and flexible with only thin PU membrane, but advanced in waterproof & windproof & breathability. Offering high level of comfort by its hydrophilic monolithic membrane (non porous). Eco – friendly non fluorinated fabric. Made by Toyota Tsusho (Japan).

Gelanots HB

A polyurethane hydrophilic monolithic membrane with extreme thinness (12 – 15 micron). In addition to maintaining the basic features of waterproofness and windproofness, this membrane will keep you comfortable under wet and humid conditions through its high breathability up to 39.000 g/m²/24h in B1 testing. Eco – friendly non fluorinated fabric. Made by Toyota Tsusho (Japan).

Hybrid system

The main aim of the Hybrid system is to find the balance (joining different kinds of materials) or optimal functionality of the product ("WWW" – waterproof, windproof, vapour permeability). It is often the case of joining membrane and non-membrane materials, completed with functional knitting to optimise the functionality.

Moisture management

Chemically modified polyamid fabric in which the fibres encourage moisture to transport moisture away from the skin to the garment's outer surface.

Polartec® Power Dry®

Polartec® Power Dry® fabrics are designed to keep your skin dry when you sweat. Ideal for runners, skiers, and adventure travelers, all fabrics in this series feature a patented bi-component knit construction that uses different yarns on either side of the fabric. This creates two different surfaces: one that is optimized to move moisture away from the skin, the other to dry quickly.

Richter by Südwolle

100% merino wool made of best quality Südwolle yarn. Thanks to its unique fibre structure has merino unique warmth, anti-bacterial ability and is odour resistant. Absorbed moisture becomes warmer very quickly so wet garment does not chill. All listed unique abilities makes Merino garments perfect choice for any outdoor activity.

Swing Cool

Soft and comfortable fabric, keeps cool and dry. Long lasting performance – wash after wash.

Tecnostretch

Pontetorto Tecnostretch, is ideal for base and mid layering. The component yarns make the face durable, whilst the polyester reverse has both insulation and wicking properties - added elastomer ensures a body hugging fit.

Nature top friendly

We designate DIRECT ALPINE products as "NATURE TOP FRIENDLY". Development and production of materials and these products is implemented wholly in countries with maximum ecological standards. These are given by the high living standard and naturally by legislation. In practice it means that during the production or dyeing of fabrics all waste is ecologically liquidated and waste water is treated when it comes out of the factory. Nature Top Friendly clothing is manufactured exclusively in European countries from materials that also come from Europe, or from materials coming from developed countries with high environmental standards, such as Japan, South Korea or the USA. This minimises the ecological impact caused by shipping goods over long distances. Everything is done within European countries. If products are manufactured from recycled material or can be recycled easily, we also mark this on specific products.

Bluesign®

Textiles and accessories carrying the bluesign® approved label meet the strict safety and environmental requirements of the bluesign® criteria. These articles are made from bluesign® approved chemical products and raw materials and are produced in a resource conserving way with minimum impact on people and the environment.

NEVER OUT OF STOCK programme

Models which you can assume will always been in stock in standard sizes throughout the entire main sales season. Stock numbers are under constant monitoring, and if for non-standard, unanticipated reasons one of the sizes is sold out, operative additional production is prepared with a delivery period of approximately one month from your order. After the season, in the period of any post-season sales, it is no longer possible to guarantee full availability.
