## COLLECTION WINTER 2018/19 – INTRODUCTION

### „SATISFACTION!“

First ascent of the Eight Thousand and first time in the Himalayas. And what a success! The SATISFACTION route. The name of this new route on the 'Eight' after the last number of months resonates with the whole Directalpine team. For me personally it's a fascinating event, outstanding not just on a Czech level but even at world level. And it was achieved by one of our ambassadors – Zdeňek Háček alias „Háček“ (The Hook). Our boy Zdeňek, along with Mára Holeček completed their years-long project – the demanding first ascent of the Eight Thousand and in alpine style!

For me it wonderfully fulfills the idea of applying the pure alpine style under extreme Himalayan conditions. In mountaineering there's probably nothing purer and more authentic. It's exactly why I love mountains so much. We're there on our own, just me my partner on the line and that hill before us.

Zdenek Hak  
DIRECTALPINE AMBASSADOR  
Gasherbrum I (8 080 m)  
New route „SATISFACTION“

And after Háček got back he comes and tells me:

*„Hey, I took some gear there that I knew I could trust and that wouldn't let me down whatever the situation.... CASCADE.....What to say? My favorite pants. I use them all year round, so on the Gash they went with me. Clearly a basic pair of pants for everything from traveling by plane through to the approach trek, base camp, and as the main pants the whole time. I hardly took them off. Comfortable, good breathability, I don't sweat in them, they're light, quick drying. What more to say? A superb pair of pants! Up the top, just pulled a pair of MIDIs over them and sorted! All for less than eight thousand crowns (\$360). Yeah..and those gloves, WALLIS, excellent! Just the job! Not until really high up did I have to change to feather down ones. All these things...*

*Great work guys and a big thank you!"*

If there was anything to convince me that at Directalpine we're doing things right, it was this conversation.

Once again, I want to take this opportunity to congratulate both guys on their incredible endeavor. For Háček, what makes it an even bigger achievement is that it was his first attempt at the Eight Thousand and he managed it straight off, first time!

The funny thing is that only a few days before they left, this crazy guy was on a solo climb up the Ortler. And then, only a few days after we got home he packs his things and sets off with a client on a tour of the Piz Bernina. „Gotta go to work“ he says.

## Bivouac - Gasherbrum

Zdenek Hak

Marek Holecek

It's fantastic to be working with this kind of people and to be friends with them and I'm proud to know them and that they test my products - things I've thought up and crafted to perfection. And when such masters as these praise them - that's satisfaction indeed!

It's a great reward for me to see that customers from all over Europe believe in our products. And for me that's a personal commitment. Our customers - mountain climbers, skiers, in fact all outdoor enthusiasts- won't be let down.

Just like a good friend won't let you down. And I firmly believe that Direct alpine clothing will also be just such a good friend to you too.

Yours, Radek Nováček

*Radek Nováček*

P.S. Like all our collections this one is full of changes and innovation. We've added new colors and attractive rejuvenating color combinations into our Limited Edition range and we're gradually moving over to a new style of cut. For years our products have been recognizable by the safe, harmonious oval line cut of the parts.

We've decided on a bold change which is certain to contribute to the success of all this year's new additions; extra cuts and seams, dividing lines and a new, geometrically more angular design. Vertical lines extending up to the shoulder, reinforcing the figure's optical appearance, evoking growing energy. In short, it's a new face to our construction and one you're sure to appreciate.

In this way we want to bring to our products an optical dynamism, progression and a slightly more aggressive feel.

We want to visually emphasize the technical aspect of these garments. In further collections we are going to bring innovations to our other products too and I believe that in this way we can bring a visually younger look to our products. Top quality functionality and a developed cut will of course stay - we play around with every millimeter of thread, seam and zip. Every model is derived from dozens of prototypes before we come to a final design that we can introduce to you.

I believe that you will be just as satisfied with the new Direct alpine style as we are ourselves.

Radek Novacek, owner & designer, Mt. McKinley

# MOUNTAIN TOP SERIE

The Mountain Top Serie of technical models is intended for demanding activities in mountain conditions, for expeditions and for other extreme activities. During the development of this clothing we stress maximum utility value, comfort of movement and protection of the user. We use the latest technology and cutting-edge components, and we carefully select intelligent, multifunctional materials which guarantee excellent properties and parameters even at relatively low weights. We focus maximum attention on the overall processing of the models and their cut. The characteristic traits of this range are the technical design, functional accessories, details for the given use and practical colours. For our customers the products of the Mountain Top Serie represent their assurance in the mountains, on expeditions, on cliffs or for regular outdoor use. They know that they can always rely on them!

The Mountain Top Serie represents the traditional values of the brand DIRECTALPINE – uncompromising quality, functionality and reliability.

# revolt

A flagship of the Directalpine collection. A top quality technical jacket for the most demanding mountain activities in a new improved design. Comfortable, stretch hardshell with a revolutionary technological 3D membrane providing very high breathability. The deliberately simple construction of this garment eliminates the risk of damage and, thanks to the high quality cut, it hangs extremely well. The shoulders have now been reinforced with tough, fray-resistant protectors. Reliability, comfort, low weight and packability are the leading features of this unique jacket which can be used all year round for mountain climbing, VHT, hiking and skiing.

# FUNCTIONalize YOU

Raised front edge of the collar to protect the face.

The comfortable finely-worked hood is incorporated into the high-protection collar and can be adjusted horizontally and vertically. It is big enough to go over a helmet and doesn't obstruct vision or limit head movement.

Shoulder panels reinforced with highly fray-resistant protectors with logo.

Two big bellows breast pockets.

Light side panels to save weight.

Two zipped side pockets which can also be used as ventilation slits.

Uses materials with wonderful breathability.

Central zip with a two-way zip and protective inner hem.

Shaped front bottom edge for comfortable leg movement.

The bottom edge can be adjusted with a simple elastic drawcord (sleeves also).

Anatomically shaped sleeves with adjustable cuffs.

# devil alpine jacket

Hardshell jacket designed for the most demanding climatic conditions. Ideal for expedition enthusiasts, mountain climbing, ski alpinism, mountain hiking, hiking, skiing. The material guarantees maximum protection against water and wind with excellent permeability. Technical, close-fitting, anatomical design with a minimum of seams for unlimited movement and perfect fit. Functionality and simplicity eliminate malfunction and are important requirements for even the most demanding activities. Combination of quality materials and appropriate technology provides maximal functionality while maintaining a low weight. This „legendary“ model has been around for 18 years, produced in various generations, and thousands of travelers have lived their dreams thanks to this reliable mountain jacket.

Practical, large, easy to access pocket on chest. Zip pocket inside with outlet for electric cables.  
Additional pocket on left shoulder.

Underarm zippers for ventilation.

Possibility to open the jacket on the right side for enhanced mobility or when sitting down.

Bottom edge adjustable one-handed with elastic cord (even when wearing gloves).

Thanks to the asymmetric main zipper there is no rough strengthening across the face (the chin and the mouth) like in the case of standard straight main zippers. In addition zipper freezing by frozen exhaled air is eliminated.

Outer zips waterproof.  
Central zip and zip of the main pocket reinforced for extra stability.

Recco signal reflector.

Side zip entrances accessible also when carrying a backpack - allow access to the lower layers while venting the body. Pit zips for ventilation.

The front part is shortened and shaped for free movement of thighs during ascending. Extended backside.

Anatomically formed sleeves for freedom of arm movement. Shaped cuffs with Velcro adjustment.

# guide

Our bestseller, now in a new, improved design!

This top quality protective jacket for the most demanding exertions has been given an adjusted cut and a more resistant material used for the collar and cuffs to give it a longer user life. Guide is the ideal jacket for mountaineering, hiking and alpine skiing. It has minimal weight and, at the same time, the durability of classic hardshell. The combination of resistant materials, minimal weight, precise anatomically-fitting cut, a range of technical details and the use of modern technology makes this the ideal functional back-up jacket that will never let you down. Assuredness, comfort and protection against inclement weather for all your adventures in the wild.

Uses materials with wonderful breathability.

Firm hood with multidirectional adjustment, can be pulled over a helmet.

Central two-way zip with protective inner hem.

Raised front collar to protect the face, ventilation openings, an asymmetrical central zip which doesn't touch the face, the unzipped insert can be secured (by magnets) to the inside of the hood.

Large bellows front pocket, one inner zip pocket, an additional pocket on the sleeve with a space for a Recco signal reflector.

Anatomically shaped sleeves with adjustable, reinforced cuffs.

Side vents which are easily reachable even when wearing a backpack, zips extending into the front part giving access to base layer pockets.

Back part elasticated at the waist to make it more figure hugging at the back.

Shaped bottom edge for comfortable leg movement, extended rear part.

# guide lady

# FUNCTIONalize YOU

A new version of this bestseller, GUIDE LADY is the top quality technical jacket every woman should have; a clear choice for trips to the mountains, alpine skiing or demanding treks. The main features of this model are minimal weight, great packability and, at the same time, as long-lasting and robust as a classic three-layer hardshell. The wonderful parameters of the membrane and backed seams keeps it waterproof. The jacket has a precise, anatomically fitting cut, a range of technical details and makes use of modern technology. All this makes it a top quality mountain jacket even for extreme conditions. A model for the active woman who lives for the outdoors and wants to feel good in every kind of weather.

Central two-way zip with an inner protective hem.

Uses materials with wonderful breathability.

Anatomically shaped sleeves with adjustable cuffs.

YKK zippers

Extended rear part.

Firm hood with multidirectional adjustment, can be pulled over a helmet.

Shaped collar front, an asymmetrical central zip which doesn't touch the face, the unzipped insert can be secured (by magnets) to the inside of the hood.

Two large front pockets, one inner zip pocket, an additional pocket on the sleeve to hold a Recco signal reflector (a device to aid mountain rescue searchers in case of avalanche).

Side vents easily accessible even when wearing a backpack. Zips extending into the front panel giving access to pockets in the base layer.

Asymmetrical central zip which doesn't touch the face

## midi

Very lightweight upper reserve pants with excellent compressibility. A high quality functional 3-layer laminate with the weight of a two and a half layer one, with significantly higher lifespan and resilience. Comfortable and stretchy material. Technical treatment and details allowing year-round seasonal use. Ideal reserve pants for mountain hiking, mountain climbing, ski touring and all outdoor activities.

One zip pocket which also serves as a practical transport pocket when the pants are rolled up.

Water-repellent side zips asymmetrically moved to the rear parts (elimination of damage) allowing ventilation and, most importantly, allowing the pants to be put on over boots (including ski boots).

Lower edge of legs with circumference regulation, sufficiently wide to fit even over ski boots, with additional securing hook for clipping the lower part onto laces.

Inner side of knees reinforced with wear-resistant fabric.

Packed pants

Tested by mountain guide (UIAGM) Zdeňek Hák on the SATISFACTION - GASHERBRUM I expedition. Hák says:

"On Gash I took with me things from Direct that I know and use, and I knew they wouldn't disappoint in any situation... I tell you, on the Gash these pants really surprised me! I originally wanted to do the whole route in classic DEVIL ALPINES but then I decided to try and cut down on weight and save a few grams. So I plumped for MIDI. I really put them through the mill but they stood the test!! To tell you the truth, I was very surprised at how much they stood up to and how well they are cut (which, for that matter, all your pants are). Yeah, they picked up a small hole from crampons. I was pretty tough on them, but then again, as always, it only costs a few crowns to repair them, doesn't it? MIDI were the biggest positive surprise of the trip when it comes to equipment. A big thank-you for these great pants!"

## trango

Protective outer jacket with outstanding characteristics and a very light weight. Developed for demanding activities and for harsh weather conditions. You will be able to enjoy it all-year-round while climbing, ski-touring, mountaineering, hiking or skiing. A high degree of comfort thanks to the used material and its improved design. The hybrid combination of stretch softshell and a 3-layer laminate additionally increases the functionality of the product. The inner layer of the sandwich is principally made from a stretch fabric a high-quality terry cloth material (polyester yarn) with an increased transmission capacity for the removal of inner vapour. Anatomically comfortable, exact fit, simple design with important details, top technology and material constitute an excellent technical model.

The hood can be pulled over the helmet; all-directional adjustment.

All seams are sealed. Seams are sealed with a covering tape on the outer side. All laminated zips are waterproof.

Two zipped crosswise pouch pockets on the chest. Additional zipped pocket laminated on upper part of sleeve.

Zipped ventilation of armpits also allow access to inner layers of clothing.

Bottom rim with one hand adjustment; elastic rubber cord fixed inside the jacket.

Anatomically shaped sleeves allowing unrestricted arm movement. Adjustable rim of the shaped sleeve.

Sufficiently extended backside; front part shorter to ease legs lifting.

# alpha jacket

A light and wonderfully packable jacket. Lined with an extremely light material, Pertex Quantum Air. The hood, sides and forearms are made from a tough, breathable material, Swing Cool. It has a modern, highly air-permeable elastic insulation material, Alpha Polartec. It now comes without a lining to reduce weight. The anatomical cut, in combination with these functional materials, creates a super standby insulated jacket particularly suitable for aerobic activity. Thanks to its wonderful wind resistance it ensures protection even in the most inclement climatic conditions, minimizing the loss of body temperature. A perfect, comfortable breathable jacket – a clear choice for mountaineers, alpine skiers or even for leisure trips or any other kind of outdoor activity.

A close-fitting hood incorporated into the collar made from the material, Swing Cool.

Two side zip pockets above the waist.

Sleeves with under-arm inserts to give free arm movement.

Elastic side panels of Swing Cool material – snug fitting insulation.

Air-permeable elastic forearms from Swing Cool with practical elasticated ends.

A simple, easy to adjust elasticated drawstring in the bottom seam of the jacket.

# FUNctionalize YOU

At last, now in a ladies version! Following on from the huge success of the men's ALPHA model, we now bring the comfort of Polartec Alpha insulation to our sporting female customers. The new BORA jacket – light as a feather, comfortable, wind-resistant, breathable and functional. The outer material, Pertex Quantum Air, is combined with a highly porous Polartec Alpha insulation layer. A perfect combination for energetic movement particularly in colder weather. An anatomical cut along with elasticated sides ensures that this jacket fits perfectly on the body. Great to use as a classic outer jacket but can also be used as an insulating second layer. This is just the model for every lady who likes strenuous winter mountain crossings, alpine skiing and ice climbing but can also be used for hiking, trekking or cross-country skiing.

Lightly insulated hood.

Lightly elasticated side parts for better figure-hugging fit.

Breathable elasticated underarm sections.

Reflective piping on the sleeves and pockets.

# alpha active

This new addition to our collection is a must for every active outdoor enthusiast. Particularly ideal for alpine and cross-country skiers, climbers and high mountain hikers. This highly technical hybrid model is based on the concept of protecting and insulating the central part of the body with a light material, Pertex Air, with the extremely breathable insulating material Polartec Alpha, and light breathable side panels and sleeves. The result is a wonderfully fitting, light, insulated jacket giving ideal warmth, comfort and wind protection during activities in cold weather. At the same time it is very breathable and wicks away sweat from the body increasing wearer comfort. Great as a protective top layer against wind or as light insulation under a hardshell jacket.

Wonderfully fitting, light, insulated hood.

Two breast pockets and two zipped side pockets.

Breathable elasticated panels in the sides.

Free arm movement thanks to the elasticated, anatomically shaped sleeves.

A simple, easy to adjust elasticated drawstring in the bottom seam of the vest.

## alpha vest

An extraordinary light and very packable body warmer. The outer material is Pertex Microlight supplemented with highly durable Pertex Quantum on the collar and shoulders. Modern, elastic, highly breathable Alpha-Polartec insulation, now without a lining for reduced weight and even better aeration. Its anatomical cut, in combination with the functional materials used, creates a comfortable, light insulation layer particularly suitable for aerobic activities. Thanks to its wonderful wind resistance it ensures protection even in the most inclement climatic conditions, minimizing the loss of body temperature. A bodywarmer which you will be sure to want with you on any mountain trip, whether alpine skiing, or on outings or as a wonderful, light backup for any kind of outdoor activity.

Soft, close-fitting, warm collar.

Anatomically shaped covering of shoulder joints to increase warmth and comfort.

Two side zip pockets above the waist.

Side panels without insulation for maximum weight reduction.

A simple, easy to adjust elasticated drawstring in the bottom seam of the vest.

Directalpine test team - Dachstein

All-year-round sports jacket for active movement. It can also be used as base-layer insulation in colder conditions. A purpose-made hybrid combination of materials gives this garment increased functionality. This softshell jacket is perfect for sports activities in the countryside where its excellent breathability and high level of wind protection are most appreciated. Ideal for climbing, hiking, high-mountain hiking, MTB, cross-country skiing and alpine skiing. In short, a universal model for all outdoor activities.

Shoulders and elbows reinforced with fray-resistant fibers.

Contrasting elastic inserts.

Zip pockets not reaching down to the waist and supplementary breast pocket.

Functional side panels for better breathability and weight reduction.

C Cordura

Anatomically shaped with a high collar and close-fitting hood.

Hybrid System - different pieces of material have been put together in such a way as to cope with the physiological demands they are expected to withstand.

B Shaped sleeves for free arm movement.

Drawstring on the shaped bottom edge that can be adjusted with one hand.

# mistral

# FUNCTIONalize YOU

The solution for all alpine skiers, climbers and mountaineers. A jacket for the real sportsperson. MISTRAL is a perfectly example of the ideal cut and an ingenious combination of functional materials. It is intended particularly for outdoor enthusiasts looking for a universal jacket for the widest range of demanding outdoor activities. The hybrid construction of this jacket cleverly combines two types of resistant softshell with Cordura: stronger one for higher protection and lighter one for weight-saving and packability. The shoulders are reinforced with stiffened, high-resistance material with a membrane. Elastic inserts in the sides and forearm ensure great mobility and maximum breathability. In short, Mistral is the perfect jacket for active sportspeople all year round. Alpine and cross-country skiing, climbing, cycling, hiking – maximum comfort wherever you are.

Light hood, suitable under a helmet, packs into the collar, secured with a zip.

Large breast pockets (for gloves, ski pass).

Elasticated bottom hem.

Comfortable high collar with adjustment.

Shoulders reinforced with high resistance fibers and with a membrane.

Reflective stitching in the sides and sleeves.

Light hood, suitable under a helmet

Large breast pockets (for gloves, ski pass)

## couloir plus lady

Softshell pants, suitable for colder, windier conditions. Primarily intended for winter exercise in the mountains, particularly alpine skiing. Thanks to the arrangement of parts with different directions of stretchability these pants sit wonderfully and allow a high degree of movement. This hybrid combination of materials increases the physiological functionality of this model (Hybrid system). Thanks to the new lining they are lighter and better at wicking away sweat from the skin. Ideal pants for alpine skiing and other winter activities.

## cascade lady

Very comfortable, well-designed year-round trousers for the widest range of outdoor activities. Completely universal trousers, can be used very well for trekking, mountain climbing, climbing, hiking, cycling or everyday wear. They have long been a popular model, in particular because of the great and effective combination of functional materials and very well designed comfortable cut. Thanks to the combed bottom (inside) side of the basic parts ideal for whole year. Anatomically exact cut for unlimited mobility. Used fabrics with high elasticity and resistance. Hybrid combination of materials with fast-dry (vapour transportation) and thermo-insulating adjustment (maintaining body temperature).

"SATISFACTION"  
GASHERBRUM I (8 080 m)  
HIMALAYAS  
ZDENĚK „HÁČEK“ HÁK  
AUGUST 2017

Tested by mountain guide (UIAGM) Zdeňek Hák on the SATISFACTION - GASHERBRUM I expedition. Háček says:

"On Gash I took with me things from Direct that I know and use, and I knew they wouldn't disappoint in any situation... CASCADE...What can I say? My favorite pants. I use them all year round, so on Gash they went with me. Clearly a basic pair of pants for everything from traveling by plane through to the approach trek, base camp, and as the main pants the whole time. I hardly took them off. Comfortable, good breathability, I don't sweat in them, they're light, quick drying. What more to say? A superb pair of pants! Up the top, just pulled a pair of MIDIs over them and sorted! All for less than eight thousand crowns (\$360) :) Great work guys! Thanks!"

*Hák*

# FUNCTIONalize YOU

## cascade light

A lighter version of our most successful technical pants, Cascade Plus. Thanks to the hybrid combination of lighter functional materials these are intended mainly for active movement. They are very suitable for skialp, mountaineering, trekking and for most outdoor activities. The leg endings have zips and elastic inserts allowing them to be pulled over ski-alpine boots. The anatomically precise cut gives unlimited movement. Treated fibers for quick drying, high flexibility and functionality ensure both user comfort and long user life.

Comfortable waist with adjustable belt and buckle.

Two front pockets and one larger hip pocket easily accessible even in a harness.

A Oděruodolná prodyšná tkanina

Uses elastic seam technology.

Supplementary material - light Cordura and an elastic, airy knitted fabric.

Side zips and elasticated inserts allow the leg endings to be widened so that they can be comfortable pulled over boots.

B

A basic fiber mix supplemented with a polyester lining to wick away moisture.

C

Reflexive safety details for nighttime visibility.

D

Zesílení

Leg endings reinforced with wear-resistant fibers.

weight: 355 g (L)

sizes: S, M, L, XL, XXL

style: man (REGULAR FIT)

Thermo-protective technical jacket with highly insulating Climashield (Made in USA). Effective hybrid combination of two Pertex materials. Shoulders and hood from resistant Pertex Endurance and the rest from lightweight Pertex Quantum. Filling – well known from high quality sleeping bags – provides better thermal insulation properties than any other synthetic fleece. The jacket effectively combines two insulation to ensure the most effective thermoregulation and minimal weight. Using high-quality materials, sophisticated cuts and excluding all irrelevant details, we developed a lightweight, highly functional jacket for extreme weather conditions. Great for mountaineering in the winter, ice climbing, mountain skiing or expeditions. This model was developed with a strong emphasis on functionality, anatomy and simplicity, which eliminate malfunction and are important requirements for the most demanding activities.

102 g/m<sup>2</sup>

Fully adjustable hood can be worn even over a helmet.

Asymmetrical zip cannot freeze over when breathing or inhibit movement.

136 g/m<sup>2</sup>

Seamless top and shoulder caps for extra durability.

Two zippable side pockets, one breast pocket and supplementary zip pocket on the sleeve.

Anatomic sleeves with easily adjustable cuffs. Possibility to stuff gloves into the cuffs (without tape, dry zip or a tight snow cuff = functional and easy!)

Adjustable waistband with one-handed hem adjuster.

Pit zip venting which is also a very convenient side access to reach inside the jacket or a pocket in the layers beneath.

Two large mesh pockets inside (for gloves, climbing skins etc.).

The clever cut of the sleeve allows greater mobility of the arms when lifting the hands (e.g. climbing) without the jacket riding up.

Insulating layer or flap beneath all zippers.

102 g/m<sup>2</sup>

Possibility to pack away the jacket in its hood.

#### material:

# impulse

# FUNCTIONalize YOU

Every mountain climber, alpine skier or enthusiast should have the new Impulse insulated jacket as part of their gear when they're out on the mountains in winter. Thanks to the use of special materials and a specially designed hybrid construction, this jacket is very light and packable and at the same time fully functional. We've used two different weightings of the top insulation fabric, PrimaLoft Silver. The heavier material is used on the body for high protection against cold, quilted with stylish technical stitching to prevent riding. A light insulating material is used in the sides and sleeves to ensure better breathability and free arm movement. The outer material, Pertex Quantum Air, gives perfect wind protection. Belay is the ideal jacket for any kind of outdoor adventure, either as an outer layer or as an insulation layer under a hardshell jacket.

The jacket can be packed into the hood.

A light, lined hood that can be worn under a helmet.

133 g/m<sup>2</sup>

Attractive quilted material.

Anatomically shaped sleeves.

Two main zip pockets, one additional inner zipped pocket.

60 g/m<sup>2</sup>

Elasticated cuffs.

SERIE

freya

The elegant FREYA winter jacket will be a boon to all ladies who want to emphasize their sporting image and at the same time feel comfortable and at ease. A great choice for cold winter days, for demanding mountain events or for any kind of outdoor activity. The inner material, Pertex Quantum Air, gives perfect wind protection. The insulation layer is purposely divided into a hybrid arrangement: the main body of the garment is created from a heavier, warmer material to ensure high protection against the cold, while the sides and sleeves use a lighter insulation for better breathability and freer arm movement. The result is a very light, packable, and at the same time beautiful, warm jacket. Freya is highly suitable for winter mountain crossings, climbing and alpine skiing, but also, because of its interesting and attractive design, it can even be worn for everyday wear.

Insulated hood.

# FUNctionalize YOU

## furry long

Following the positive reception of the Furry when it was introduced into the 2018 summer collection we now introduce a long-sleeved version of this vest made from merino wool. This model too uses this popular warm, natural material with its natural antibacterial properties and light weight. High quality, pleasant to the touch, 100% merino knit along with a highly developed cut makes this vest comfortable both for everyday wear as well as for sports activities such as skiing, hiking or mountaineering. An ideal vest for all-year-round use.

**material:**  
100% Merino Wool (Sudwolle), 50 g/m<sup>2</sup>, special anti-twisting yarn

**weight:** 175 g (L)  
**sizes:** S, M, L, XL, XXL  
**style:** men (REGULAR FIT)

# OUTDOOR SERIE

For many seasons now we have been developing products of the Outdoor Active serie for the broader outdoor public. These are reliable models for everyday outdoor events. But as a result of the quality of the materials and careful workmanship, they can also be used under the most demanding conditions. The casual and very comfortable cuts and naturally also the use of high-quality functional materials guarantees the customer excellent comfort both for the regular outdoors and during everyday wear. We pay great attention to the design of the cut and all the details. The common trait of the models from this series is great value for invested money.

The models of the Outdoor Active Serie are distinguished by their imaginative, creative design with technical elements and well-designed details. The colours and details are based on current trends.

For this series our customers always appreciate the typical merits of DIRECTALPINE brand products, mainly pure utility, quality and perfect workmanship.

# talung

# FUNCTIONalize YOU

A practical reserve jacket for most normal outdoor activities based upon our most successful hardshell jacket, Guide. It's made from a light triple-layer material giving excellent protection against water penetration while allowing humidity out. The adjustable hood is precisely cut with a peak. The shoulder and side panels are reinforced for increased protection against mechanical damage. The two main side zip pockets are easily accessible even with the tummy strap of your backpack fastened or when wearing a harness. In addition there is a spacious breast pocket. The anatomically shaped sleeves have easy-to-use zip vents in the back section. Thanks to the elasticated waist the jacket adapts wonderfully to your base-layer of clothing. The bottom edge of the jacket is anatomically shaped for maximum comfort and is fitted with a drawstring which can be tightened with one hand.

Easily accessible side pockets, one spacious breast pocket.

Adjustable strap in the rear panel (for a closer fit to the back).

Anatomically shaped sleeves; adjustable cuff opening.

Stiffened hood with adjustment.

Ventilation openings in the back of the sleeves, easily reachable even when wearing a backpack.

Extended back section.

## material:

Base: Hardshell 3-layer laminated DERMIZAX  
 1-layer - outer: high strenght functional fabric 100% PAD, DWR (PFOA free, ECO Friendly)  
 2-layer - membrane: DERMIZAX - 20.000 mm H<sub>2</sub>O / 8.000 g/m<sup>2</sup>/24 hr., 100% PUR  
 3-layer - inner: 100% PAD  
 Reinforced shoulders, chest pocket and back:  
 GELANOTS 20.000 mm H<sub>2</sub>O/20.000 g/m<sup>2</sup>/24 hr., DWR (PFOA free, ECO friendly)  
 100% sealed seams

weight: 386 g (L)

sizes: S, M, L, XL, XXL

style: men (REGULAR FIT)

# robot

An attractive multi-functional jacket. A functional combination of robust ripstop cotton fibers treated with Hydrophobic Extreme, a long-proven durable material used in our best selling Patrol pants. In this model we've managed to combine classic natural fibers and the latest technology with a lighter, more elastic, resistant material to give great overall functionality. Impregnation with Hydrophobic Extreme significantly improves the properties of the cotton fibers, extends their user life, increases protection against water, improves breathability and also makes them more resistant to soiling. The repellent remains fully functional even after dozens of washing cycles. Its functionality can always be renewed just by ironing the fibers. This jacket not only admirably protects against inclement weather but also stays very breathable. Robot is a jacket suitable for the widest variety of outdoor activities and is popular with both traditional customers and innovators. Thanks to the developed anatomical cut and new elastic parts this jacket sits perfectly, doesn't restrict arm movement and is even adapted to climbing. Because of the materials used (cotton, synthetics from renewable sources) this product is very environmentally friendly with regard to both production and maintenance. A repellent is applied using plasma treatment on the dry textile during which no waste substances occur and the release of repellent during washing is minimal. The material is easy to recycle and very environmentally friendly.

Anatomically shaped sleeves allow free arm movement. The aperture of the shaped sleeve end can be adjusted.

Bottom edge of the jacket can be adjusted with one hand.

Seams: Special water expandable thread core for increased water resistance of seams (core plaited from 100% cotton).

Hood with a sufficiently long peak, adjustable in all directions.

The main asymmetrical zip doesn't press across the chin.

The second zip at the chin, even in the harshest climatic conditions, ventilates the jacket while at the same time providing high protection to the face.

The shoulders and elbows are reinforced with wear-resistant fibers.

Two zippable breast pockets and two side zip pockets that can be used for ventilation.

Shorter front part, shaped for freer leg movement.

Extended rear part.

Hydrophobic Extreme

# defender

Practical and robust travel pants for reliable long-term wear. A functional combination of robust ripstop cotton fibers treated with Hydrophobic Extreme, a long-proven durable material used in our best selling Patrol pants. In this model we've managed to combine classic natural fibers and the latest technology with a lighter, more elastic, resistant material to give great overall functionality. Impregnation with Hydrophobic Extreme significantly improves the properties of the cotton fibers, extends their user life, increases protection against water, improves breathability and also makes them more resistant to soiling. Hydrophobic Extreme is a very long-lasting repellent, applied to the dry material as a plasma. The repellent remains fully functional even after dozens of washing cycles. Its functionality can always be renewed just by ironing the fibers. Pants from this innovative classic material not only admirably protect against inclement weather but also stay very breathable. The developed anatomical cut, together with the use of new elastic parts guarantees a perfect fit. The long user life and usefulness of DEFENDER makes them ideal pants for a wide group of customers who are active outdoors in harsher conditions. Thanks to their many pockets they are also suitable for the most arduous expeditions. Due to the primary source material (cotton and synthetics from renewable sources) this product is ecological from the point of view of production and doesn't put a strain on the environment. Repellent is applied using plasma treatment on the dry textile during which no waste substances occur and the release of repellent during washing is minimal. The material is easy to recycle and very environmentally friendly.

## HYDROPHOBIC EXTREME:

**HYDROPHOBIC EXTREME** It is hydrophobic and oleophobic finishing of textiles, be it cloth, webbing or nonwoven textiles.

A thin nano layer of fluorocarbon is created on the surface making it extremely water-repellent and oleophobic.

Hydrofobic Extreme finishing developed by NANOMEMBRANE involves every single fiber being coated with a thin layer of nanoparticles. The result is an extremely high level of hydrophobic and oleophobic finishing that prevents water, wine, coffee or grease from making stains on the surface of the textiles or even damaging them. This results in a self-cleaning effect similar to that of lotus leaves.

In contrast with commonplace hydrophobic and oleophobic finishing processes, interfiber pores are not blocked, which prevents deterioration of conducting moisture from skin through the textile. Furthermore, it is possible to launder the coated surfaces using commonplace detergents and it has been scientifically proved that Hydrofobic Extreme is at least four times more durable than other materials. This in return saves the customer time and money.

# block

An attractive insulated jacket, great for the mountains or the city. Its hybrid construction makes ideal use of the key properties of state-of-the-art materials for maximum functionality, comfort and protection of the user. Stylish quilting of the outer material, Pertex Quantum Air, with an inner insulation layer of PrimaLoft Silver protects the central part of the body and shoulders. The side parts and sleeves are from a light elastic material, Tecnostretch, and the sleeves and bottom edge of the front and back are reinforced with Pertex for increased protection. Thanks to the elasticated parts this jacket fits snugly, adjusting to base layer clothing. This makes it wonderfully usable for a wide range of outdoor and sports activities in colder weather or even for everyday wear.

A light hood insulated with Tecnostretch material.

Insulation across the shoulders for greater warmth and comfort.

Two main zip pockets, one additional breast pocket.

Stylish quilting.

Simple drawcord in the bottom edge.

Stylish quilting.

Shaped sides and elastic parts in the sides for greater freedom of arm movement.

Reflective stitching (sleeves, bottom parts of jacket) for increased safety.

A light hood insulated with Tecnostretch material.

Insulation across the shoulders for greater warmth and comfort.

Two main zip pockets, one additional breast pocket.

Anatomical cut, stretch sleeves with inner reinforcement.

Simple drawcord in the bottom edge.

# bavella

Finally, just what you've been waiting for! A hot new arrival! We've got so many great winter vests to offer you. Every active lady will feel more comfortable and at ease in this model, even on the coldest days. Just like the whole BLOCK range, this vest makes use of a functional hybrid combination of two types of insulation. The anatomically cut body of the vest is created from an interestingly quilted outer material, Pertex Quantum Air, and an inner layer of PrimaLoft Silver. In this way it perfectly protects the central part of the body and, thanks to the extended shoulder parts, also right across the shoulders. The sides are from a light elastic material, Technostretch, which perfectly adapts to your base layer clothing and is highly breathable. The Bavella is suitable for both sports and trips to the countryside as well as for ordinary everyday wear about town.

A light hood insulated with Tecnostretch material.

Prolonged shoulder panels for increased warmth and comfort.

Stylish quilting.

Reflective stitching in the bottom part of the vest.

Armholes with elastic hems.

Two main zip pockets, one additional breast pocket.

Simple drawcord in the bottom edge.

## shield

Technical insulated jacket that can be used as a base layer under colder conditions. A modern, functional, sandwich material with an attractive appearance create a model with extremely high breathability while at the same time providing sufficient protection against cold and wind. It offers an attractive, warmer version of the classic softshell jacket. Its anatomical cut allows more freedom of movement and, thanks to the side parts made from Technostretch™, it sits perfectly. This jacket is ideal for all kinds of outdoor activity, exercise in the mountains, hiking or via ferrata in colder seasons. Also, thanks to the easy recyclability of the natural bamboo insulation, this product is highly ecological.

Practical, shaped, close-fitting hood.

Shaped raglan sleeves to allow greater arm movement.

Elastic inserts in the sides for better shape and freer arm movement.

Simple shaped bottom edge with drawstring.

# mountainer tech

After the successful reception of the model Mountainer Cargo we are expanding our range of best-selling pants Mountainer with a new model. It is based on a very demanded classic concept of reinforced knees and back part. Newly used highly functional and stretch materials guarantee high comfort and weight savings in particular. It determines them as the perfect pants for a wide range of outdoor activities such as hiking, including mountaineering, but also for casual wear. Great ratio of comfort, extremely long life and value to the price. The maximum value for a good price, pants on years of use.

Partially elastic waist with adjustable belt.

Loops for clipping braces on.

Fly with two two-way zips.

Anatomically shaped knees.

Two zippered pockets and one additional zippered pocket on the thigh.

Reinforcement knees, back part and lower inner edge of the leg.

Lower edge of legs with internal wedge, width regulation.

# patrol tech

We've extended our long-standing favorite Patrol pants with this new technical multifunctional variation. A markedly shaped cut with specially placed parts made from a light stretch material in the direction of movement offers wonderful comfort. A stronger material on the knees and seat provides greater resistance to fraying. The inner bottom edge of these pants is reinforced with a panel of wear-resistant fabric.

Partially elastic waist with adjustable belt.

Zipable side vents.

Fitted gusset for greater freedom of movement.

Practical soft thigh pocket.

Anatomically shaped knees.

Reinforced lining in the lower leg.

# apache

These new pants are the answer to the prayers of all outdoor enthusiasts. This very universal model is suitable both for long travels and spending time in the wild as well as for regular use in everyday life. In designing them, emphasis was placed on creating pants with high durability and robustness while maintaining extra wearer comfort. The main material – cotton lycra – is supplemented in vital parts with a tried and tested, highly fray-resistance material, as used, for example, in our legendary Patrol pants. Both materials are treated with Hydrophobic Extreme water repellent – a plasma treatment applied directly to the dry material to ensure long-lasting resistance to water and dirt and, at the same time, guaranteeing perfect breathability. Thanks to the highly developed cut and cleverly positioned sections of stretch fabric these pants fit perfectly. In warm weather or during sports the side zips on the legs give welcome ventilation. Durability, high comfort, and protection against water are the main selling features of this new model.

Thanks to the sourcing of these materials (cotton and synthetics from renewable sources) this product is fully ecological and places no strain on the environment. The repellent is applied in a dry method using plasma which leaves no waste material and also minimizes the release of repellent during washing. The material is easily recyclable and thus very favorable from an environmental point of view.

Waist fitted with loops for Directalpine belts.

Loops for clipping braces on.

Two front zip pockets, roomy, practical, zipped bellows pockets on the thighs big enough for a map, two rear zip pockets.

Zipable side vents.

Comfortable elasticated crotch.

Anatomically shaped knees.

Bottom edge of the pants reinforced with highly tear-resistant material.

Poppers for adjusting the leg endings and an elastic cord to hook onto boots.

# jasper

An obvious choice for every climber or boulderer!  
A stylish new jacket for cold days in the countryside for all outdoor enthusiasts. A light, soft knit from one of the leading producers, Polartec-Thermal Pro not only provides warmth and comfort but also, thanks to its elasticity, in no way restricts movement. The hood, pockets, cuffs and bottom edge of the jacket are reinforced with a more resistant material. This eliminates the possibility of damage as well as emphasizing the attractive climbing design. This jacket is intended not only for climbing and bouldering but also for other outdoor activities, trekking and for everyday wear.

Anatomically precise cut.

Comfortable hood with outer reinforcing.

Flat, elastic seams.

Two zipped side pockets, one breast pocket and an additional shoulder pocket.

# jasper lady

This new jacket, in its attractive new design, is a must for all you ladies who feel the cold. A top quality, soft, elastic knit from a leading producer, Polartec-Thermal Pro provides excellent warmth and comfort. The hood and shoulders are reinforced with a resistant material for higher protection against fraying, wind and, to some extent, rain. The looser, anatomical cut fits pleasantly and provides comfort during any kind of less demanding sport or outdoor activity. The jacket can be used for various trips in the countryside, trekking, climbing or even for everyday casual wear.

Hood with adjustable aperture.

Hood and shoulders reinforced with a more resistant material.

Markus Pucher - Dachstein  
(Directalpine test team)

# materials

**4wayTex®**

## 4wayTex®

4WAYTEX is a trademark of Direct Alpine company materials of sandwich construction, which individual layers, properly combined, ensure excellent product parameters. SOFTSHELL 4WAYTEX is focused for excellent permeability of laminate along with maintaining low weight and sufficient wind and waterproofness.

**CLIMASHIELD**  
INSULATION INNOVATION

## Climashield HL

The continuous filament insulation. High loft - High loft provides comfort and thermal efficiency with less weight. Compressible - Highly resilient fibers compress easily and bounce back to ultra loft. Warm - Traps body heat while moisture wicks away. Durable - Unlike down and other synthetic insulations, this high loft insulation is machine-washable and will not clump or shift. Water resistant - Dries quickly and maintains warmth even in wet conditions. Hypoallergenic - Unlike down, does not provoke allergies.

**COOLMAX®**

## Coolmax®

Coolmax® is a high tech fabric specifically and uniquely engineered to keep users dry and comfortable. Coolmax® fabrics are made from specially engineered polyester fibres from ADVANSA with an increased surface area. This special four-channel or six-channel fibre forms a transport system that pulls moisture away from the skin to the outer layer of the fabric.

**CORDURA**  
FABRIC

## Cordura®

CORDURA® fabric is durable, versatile and reliable. Constructed using high tenacity fiber technologies.

**Dermizax**

## Dermizax™

Dermizax™ is a 3-layer laminate with a waterproof, windproof, and wicking membrane that is specially developed to provide protection against all kinds of weather while remaining as comfortable as possible. Dermizax™ membrane is a hydrophilic material that utilizes moving molecules, as opposed to most other membranes which have micropores. This offers a number of advantages and makes Dermizax™ shell clothing the very best on the market thanks to its high performance and superior durability.

**DYNAMIC**

## Dynamic soft shell

2-3 layer laminate with excellent permeability. Material developed with particular focus on vapour-permeability along with low weight and sufficient wind and waterproofness. Weight-light, flowing laminate with inner fleece insulating layer.

## DuPont Sorona – Espol

Sorona® renewably sourced fiber delivers superior performance benefits to sustainable clothing. Fabrics that use Sorona® are very soft, very strong and dry quickly. Sorona® helps fabrics stretch comfortably and retain their shape. Sorona® contains 37% annually renewable plant-based ingredients by weight.

## Freshcool

Freshcool combines 2 technologies into 1 textile. Outside protects the textile from water, dirt and stain. Inside moisture from the skin is absorbed and quickly transmits to the outside.

**GELANOTS**

## Gelanots

Soft and flexible with only thin PU membrane, but advanced in waterproof & windproof & breathability. Offering high level of comfort by its hydrophilic monolithic membrane (non porous). Eco – friendly non fluorinated fabric. Made by Toyota Tsusho (Japan).

**GELANOTS HB**

## Gelanots HB

A polyurethane hydrophilic monolithic membrane with extreme thinness (12 – 15 micron). In addition to maintaining the basic features of waterproofness and windproofness, this membrane will keep you comfortable under wet and humid conditions through its high breathability up to 39.000 g/m²/24h in B1 testing. Eco – friendly non fluorinated fabric. Made by Toyota Tsusho (Japan).

**GELANOTS**  
Dry Shell

## Gelanots DryShell

A revolutionary hardshell material which, thanks to a combination of an ultra-thin membrane and special lining, achieves extremely high values for breathability (Moisture vapour transition rate up to 55.600 g/m²/24h) while at the same time having a very good water resistance value (hydrostatic head). This so-called 3D-effect membrane is based on a combination of a two-fibre mix (nylon + polyester) with a special three-dimensional structure which significantly increases the capillary effect. Damp is maximally dispersed through the structure of the material and effectively carried to the ultra-thin membrane which then ensures its transportation outwards to the surface of the hardshell. This system has exhibited top values for breathability (up to 55.600 g/m²/24h) along with very good values for water resistance.

**HYBRID**  
SYSTEM

## Hybrid system

The main aim of the Hybrid system is to find the balance (joining different kinds of materials) or optimal functionality of the product ("WWW" – waterproof, windproof, vapour permeability). It is often the case of joining membrane and non-membrane materials, completed with functional knitting to optimise the functionality.

**HYDROPHOBIC**  
EXTREME

## Hydrophobic Extreme

It is hydrophobic and oleophobic finishing of textiles, be it cloth, webbing or nonwoven textiles. A thin nano layer of fluorocarbon is created on the surface making it extremely water-repellent and oleophobic. Hydrophobic Extreme finishing developed by NANOMEMBRANE involves every single fiber being coated with a thin layer of nanoparticles. The result is an extremely high level of hydrophobic and oleophobic finishing that prevents water, wine, coffee or grease from making stains on the surface of the textiles or even damaging them. Highly eco friendly - no water used during the treatment of textile.

**PERTEX**  
QUANTUM

## Pertex® Quantum Air

Pertex® Quantum Air is engineered with increased air permeability to provide a balance between wind resistance and breathability. The more openly woven structure of Quantum Air fabrics allows airflow through the fabric, which helps to regulate your body heat and keep you comfortable for longer. This balance of air permeability and wind resistance means Pertex® Quantum Air fabrics are perfectly suited to intense mountain pursuits.

**PERTEX**  
QUANTUM

## Pertex® Quantum Pro

Pertex® Quantum Pro uses an ultra thin water resistant coating to provide increased weather resistance for extreme conditions. By combining a tightly woven face fabric with a microporous coating, Pertex® Quantum Pro delivers a very high level of water resistance whilst remaining lightweight, soft and breathable. The increased weather resistance and durable construction means these fabrics are ideal for use in cold or damp environments where keeping warm and dry is crucial.

**POLARTEC**  
Alpha®

## Polartec Alpha

Polartec® Alpha® is the latest evolution of synthetic insulation offering a rare combination of lightweight warmth and true breathability in a „puffy“ style garment. Because Polartec Alpha insulation is highly durable and more stable than other synthetic insulation products, more open-construction woven face and back fabrics can be selected to create an air permeable package. This small amount of airflow rapidly draws moisture away from the body and allows Polartec Alpha to be worn in a wider range of activities compared to classic „vapor barrier“ style insulation.

**POLARTEC**  
Power Stretch® Pro

## Polartec® Power Stretch®

Polartec® Power Stretch® fabrics feature body-hugging 4-way stretch and are very breathable. Many of the fabrics feature a proprietary construction with two unique surfaces: the durable, smooth outer layer is wind and abrasion resistant; the soft inner layer pulls moisture away from skin keeping dry, warm and comfortable.

**POLARTEC**  
Thermal Pro®

## Polartec® Thermal Pro®

Polartec® Thermal Pro® was developed to bring a wider variety of styles and performance functionality to synthetic fleece technologies. By reengineering our construction methods we created an expansive platform of fabric structures with superior benefits over traditional fleece. These unique textures enhance the fabric's overall efficiency and are the defining reason why synthetic fleece will never go out of style as the preferred choice for performance insulation fabrics.

**PRIMALOFT**

## PrimaLoft® Gold Active

PrimaLoft® Gold Active is the highest performing insulation on the market for warmth, water resistance, softness and compressibility. PrimaLoft® Gold Active is an ultra-fine microfiber insulation that is as warm, soft and lightweight, and is warmer wet or dry than all other insulations.

**PRIMALOFT**

## PrimaLoft® Silver

PrimaLoft® Silver is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility. PrimaLoft® Silver insulation keeps the body warm, dry and comfortable, even in extreme conditions.

**Richter**

## Richter by Südrolle

100% merino wool made of best quality Südrolle yarn. Thanks to its unique fibre structure has merino unique warmth, anti-bacterial ability and is odour resistant. Absorbed moisture becomes warmer very quickly so wet garment does not chill. All listed unique abilities makes Merino garments perfect choice for any outdoor activity.

**SHIMMER + COOL**

## Swing Cool

Soft and comfortable fabric, keeps cool and dry. Long lasting performance – wash after wash.

**TECNOSTRETCH**

## Tecnostretch

Pontetorto Tecnostretch, is ideal for base and mid layering. The component yarns make the face durable, whilst the polyester reverse has both insulation and wicking properties - added elastomer ensures a body hugging fit.

**N.O.S.**  
NEVER OUT OF STOCK

## NEVER OUT OF STOCK

Models which you can assume will always been in stock in standard sizes throughout the entire main sales season. Stock numbers are under constant monitoring, and if for non-standard, unanticipated reasons one of the sizes is sold out, operative additional production is prepared with a delivery period of approximately one month from your order. After the season, in the period of any post-season sales, it is no longer possible to guarantee full availability.
